H_2

Neoplatron Green Hydrogen Kit

An advanced fuel optimisation system supporting improved mileage, fuel utilisation and engine performance through Advanced Digital Plasma Technology (ADPT).

One Technology. Many Applications.

Applications

- Two-wheelers
- Petrol & diesel cars
- SUVs & multi-utility vehicles
- Personal & commercial four-wheelers
- CNG & LPG vehicles
- Trucks & buses
- Diesel gensets up to 1 MW
- Earth movers & construction
- Marine engines
- Other industrial engines

Who Can Benefit?

Individual Vehicle Owners
Cars, SUVs and other vehicles

Fleet Operators
Commercial fleets, trucks, transport

Industrial & Power Businesses
Gensets, earth movers, marine

Dealers & Distributors
Expand reach in new markets

How ADPT Works

01 Hydrogen Generation

Controlled electrolysis makes hydrogen on demand.

02 Engine Integration

Gas enters through the air intake system.

03 Combustion Support

Supports combustion and fuel utilisation.

04 On-Demand Operation

Generated as needed, no storage required.

Key Performance Benefits

90%	Up to **Fuel efficiency**
90%	Up to **Emission reduction**
10°C	Up to **Lower exhaust temp**
20%	Up to **Pickup & performance**
50–70%	Up to **Lower maintenance cost**
4 fuels	Works with **Petrol, diesel, CNG, LPG**

Why Neoplatron

- 19+ years of R&D
- 26,000+ installations across India
- Designed for multiple fuel types
- Passenger and commercial vehicles
- Transport, power and industrial use
- Dealer, distributor and fleet partnerships

Real Experiences. Real Feedback.
